

ProGrace equips Christians with a new way to think, talk, and engage through these two core beliefs:

1. We believe God places equal value on both the woman and the child. As we embrace this, we move to a more expansive theological perspective of consistently advocating for the welfare of both people.
2. We believe that people are transformed when grace through community replaces shame and judgment. That is the community we seek to create for all experiencing unintended pregnancy and abortion.

In partnership with your local pregnancy center, we invite local church leaders to participate in our online small group study for FREE through the end of 2022.

If it wasn't apparent before Roe vs. Wade was overturned, it is now:

Many churches are divided on abortion.

That division is causing tension within the church while also eroding our ability to reach out to those impacted by unintended pregnancy and abortion.

That's why ProGrace offers resources to help your church rise above the politics and value the *woman and child equally*.
